Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-130, drawn to a dry sprinkler, classified in class 169, subclass 37.
 - II. Claims 131-134, drawn to a method of operating a dry sprinkler, classified in class 169, subclass 43.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process for using the apparatus can be practiced with an apparatus that does not have the movable locator member of the claimed apparatus.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Should Applicant elect invention Group I, the following species restriction also applies:

This application contains claims directed to the following patentably distinct species of the claimed invention:

- A. Embodiment shown in Figures 1A-1D
- B. Embodiment shown in Figures 2A-2D
- C. Embodiment shown in Figures 3A-3F

- F. Embodiment shown in Figures 6A-6F
- G. Embodiment shown in Figures 7A-7E
- H. Embodiment shown in Figures 8A-8F
- I. Embodiment shown in Figures 9A-9E
- J. Embodiment shown in Figures 10A-10E
- K. Embodiment shown in Figures 11A-11E
- L. Embodiment shown in Figures 12A-12E
- M. Embodiment shown in Figures 13A-13E
- N. Embodiment shown in Figures 14A-14E
- O. Embodiment shown in Figures 15A-15E
- P. Embodiment shown in Figures 16A-16E

- V. Embodiment shown in Figures 22A-22E
- W. Embodiment shown in Figures 23A-23I

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3752

4. A telephone call was made to Mr. David Laub on August 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Darren W. Gorman whose telephone number is 571-272-4901. The examiner can normally be reached on M-F 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on 571-272-4919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
